

## **PRESS RELEASE**

### **SYM HUSKY 150 ADVENTURE SCOOTER HAS BEEN LAUNCHED**

**SETIA ALAM, 1 APRIL 2024** – SYM Malaysia has finally launched the much-awaited scooter, the Husky 150. This latest model is released in two variations, the Standard and Special Edition. For the Standard variant, there are two optional colours, Ebony Black and Pure White, with a starting price of only RM9,998.00, excluding insurance and road tax. The Special Edition version is released in two attractive colours, Matte Green and Wolf Gray, with a base price of RM10,298.00, excluding insurance and road tax.

Inspired by adventure features, the SYM Husky 150 is a scooter full of personality. The design showcases its elements of power, speed and style. It combines versatile functionality with sophisticated design. Husky is more than an everyday scooter with the latest features. It's a crossover masterpiece that makes the ride enjoyable. Are you looking for some adventure in your everyday life? The SYM Husky 150 is the travel accessory you've been dreaming of.

The SYM Husky 150 is powered by a 150cc, single-cylinder, 4-stroke and 4-valve engine that produces 10.8Kw at 8,000rpm and 14.5Nm of torque at 6,000rpm. Despite having a 150cc engine displacement, the Husky 150 comes with a Traction Control System (TCS) that prevents skidding. The safety features of this scooter are further strengthened with a dual-channel Anti-Lock Brake (ABS) system, which gives the rider confidence when doing emergency braking.

Among the other equipment matched on this SYM Husky, 150 is a single shock absorber on the rear suspension, which improves manoeuvrability, better stability and a smoother ride. In addition, this scooter also uses an all-new 5" TFT instrument with automatic dimming that guarantees excellent visibility in all types of environments. In addition, there are two modes

(day and night), which can be switched automatically. The information displayed is more precise to the rider.

The Husky 150 uses a keyless system that is more user-oriented and easier to operate. An emergency ignition mode lets you start the engine even if the key battery weakens.

It also has a large fuel tank capacity of 15 litres to reduce the frequency of stops for refuelling. This allows the rider to focus on enjoying the ride. The SYM Husky 150 uses a whole LED lighting system, including front, turn signals, and rear lights. Full LED lighting makes the Husky more stylish and improves riding safety.

With every SYM Husky 150 model purchase, buyers can enjoy a manufacturer's warranty of two years or 20,000km (whichever comes first) and online genuine parts purchase service by MForce Bike Holdings Sdn. Bhd.
